

Usability test sheet for Trivago website(<https://www.trivago.com/en-US>)

Participant Information:

Age: 23

Gender: Male

Occupation: Student

Task Scenarios:

Task 1: Search and Compare Hotels for a Weekend Getaway

Scenario: You're planning a weekend getaway with your partner and need to find a suitable hotel within a specific budget.

User Feedback: User was able to easily navigate the web page, and tried to book a hotel, but in the booking page, there was no budget option to choose and after selecting the dates and the location, then the budget filter option popped up.

Task 2: Explore Special Deals and Offers

Scenario: You're interested in finding any special deals or discounts offered by Trivago for your upcoming trip.

User Feedback: User was little confused as there was no deals or offers page at the home page and they tried to search for hotel, and selected one hotel, then they were able to see offers if there were any for that hotel.

Task 3: Review and Compare User Reviews

Scenario: You want to ensure the hotel you're considering has positive reviews from previous guests.

User Feedback: Reviews in the page were listed and they could filter the results based on guest rating. Also, user was happy as they can filter the results based on language

Post-Task Questions:

1. How easy or difficult was it to complete the tasks assigned?

Neutral

2. What features or aspects of Trivago did you find most helpful during the tasks?

The option where user can compare results of various other websites and they can choose whichever is convenient for them.

3. Were there any features or options that were confusing or difficult to use?

Yes, since there is no page where they can view the offers and deals in a single page

4. How satisfied are you with the overall usability of Trivago?

Neutral

5. Would you consider using Trivago again for booking accommodations in the future?

May be not
