

Usability test sheet for priceline website (<https://www.priceline.com>)

Participant Information:

Age: 23

Gender: Female

Occupation: Student

Task Scenarios:

Task 1: Search and Compare Hotels for a Weekend Getaway

Scenario: You're planning a weekend getaway and need to find luxurious accommodations for your trip.

User Feedback: User was able to easily navigate the web page, and attempted to book a hotel, for 3 days and she could select multiple hotels at once for different places. This feature made her happy as she could book hotels at once for all the cities she will be travelling.

Task 2: Explore Special Deals and Offers

Scenario: You're interested in finding any special deals or discounts offered by priceline for your upcoming trip.

User Feedback: Unfortunately, user could not investigate any offers on the website as the offers can be only viewed on app. But there is something called express deal, where user can see few hotels which offer lowest prices.

Task 3: Review and Compare User Reviews

Scenario: You want to ensure the property you're considering has positive reviews from previous guests.

User Feedback: This website has no option for reviews and user felt the need of the reviews.

Post-Task Questions:

1. How easy or difficult was it to complete the tasks assigned?

Easy

2. What features or aspects of **priceline** did you find most helpful during the tasks?

The user could select multiple hotels at once for different places, she felt that this feature is amazing.

3. Were there any features or options that were confusing or difficult to use?

There are no reviews of hotels on the website, as a user I would want to see the review of the property I will be booking.

4. How satisfied are you with the overall usability of **priceline**?

Satisfied

5. Would you consider using **priceline** again for booking accommodations in the future?

Yes
